Chapter 6: Earthworms are our friends

Quiz time

1. Earthworm poop is very important for the soil.
2. Earthworms make soil loose which helps plants breathe.
3. Write a brief essay on how earthworms help the environment.

Ans: Earthworms are amazing creatures. Their poop is very important for the soil. They eat all the impurities in the soil, and in return, give good nutrients to the soil. This is how they clean the soil. Earthworms help in maintaining the health of the soil. They dig holes and make space for the water to seep in. They also make the soil loose for the plants to breathe.
