PLANTS AROUND US

CHAPTER 5

HERBS

TULSI

Tulsi leaves smell amazing! The tulsi plant has tiny oil glands on its leaves that make it smell fresh and sweet.

HERBS

MINT

Mint makes everything cool! The mint plant has a special oil in its leaves. It is called menthol. Menthol feels cool in your mouth. You will feel it while eating a minty chewing gum or sweet!

SHRUBS

ROSE

Naturally, roses come in every colour except blue! Roses can be red, pink, yellow, or white. But nature cannot grow blue roses.

TREES

APPLE TREE

Apple trees can live for over 100 years! Some apple trees keep growing and making apples.

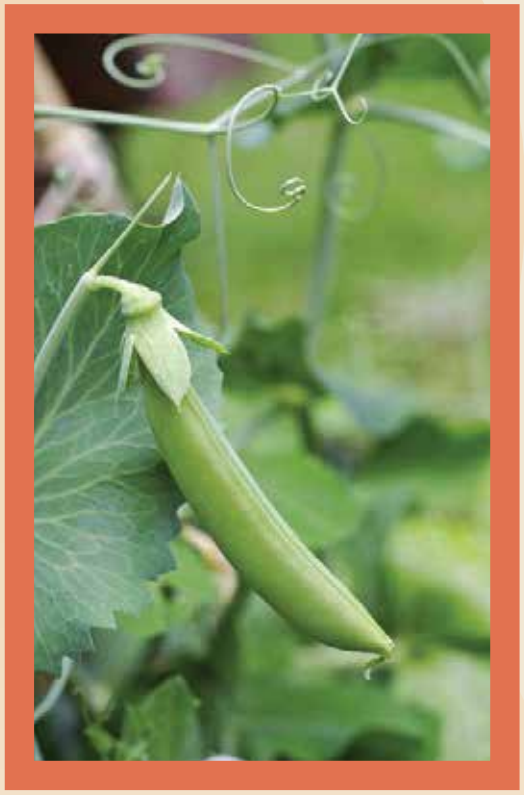
TREES

COCONUT PALM

Coconut palm trees grow best near sandy beaches. They can live in salty water. That is why you often see them swaying by the ocean.

CLIMBERS

PEA PLANT



The pea plant makes pods. When you open them, you find peas hiding inside—like a tiny surprise!

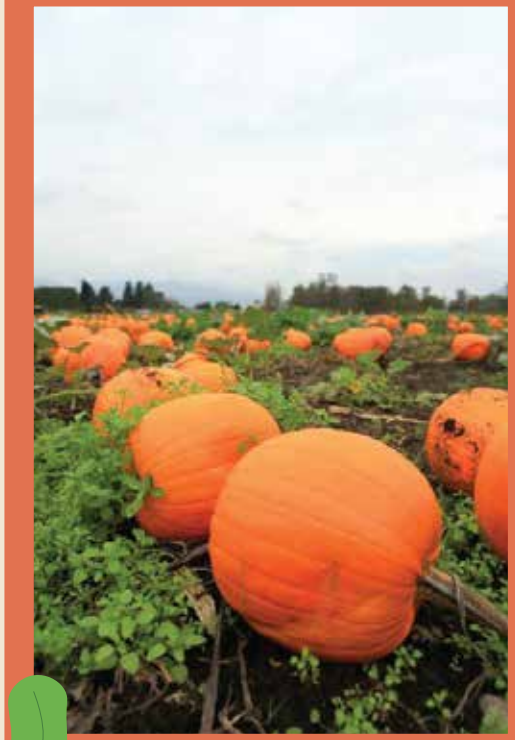
CLIMBERS

BITTER GOURD

Bitter gourd can help your body stay strong. It can fight off sicknesses!

CREEPERS

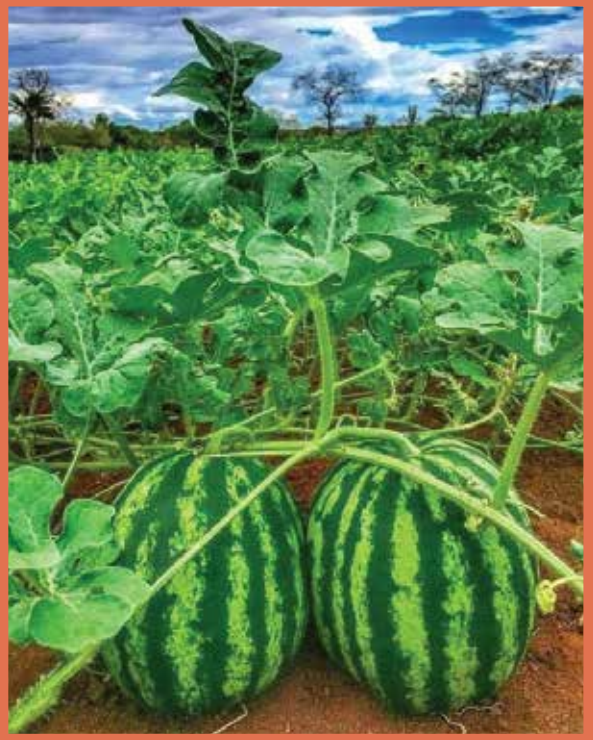
PUMPKIN

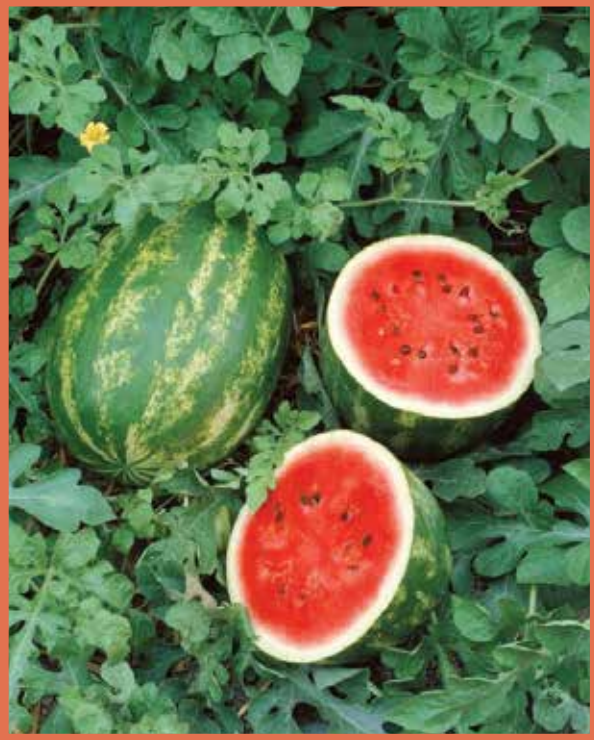


Pumpkins are full of seeds! Inside a pumpkin, you'll find lots of flat, white seeds. These seeds can be roasted and eaten. They’re full of healthy stuff for your body.

CREEPERS

WATERMELON





Watermelons are full of water! They are super juicy and refreshing to eat on a hot day.
